

## Your success is our objective!

We therefore maintain close contact to dealers and tanning salons, to suppliers and partners – worldwide. We research, develop and provide information. We proactively support a sound growth of the industry.

This enable us to offer products, services and concepts which ensure that our partners and customers achieve sustained success.

We are committed to the idea of providing people with vitality and quality of life. Through our many years of experience we know what we're doing and we also take responsibility for people and the environment.

Global state-of-the-art production plants, a spectral laboratory in Stuttgart and cooperation with ISO-certified partners ensure the best possible quality.

Quality management: lifetime tests in Stuttgart

**COSMEDICO  
CLASSIC**

*The low-pressure lamp range with the classic  
Cosmedico Cosmolux products.*

## COSMEDICO CLASSIC

These are our classic lamps that fulfil all possible requirements.

You can trust the latest enhancements to the established and proven products brought to you by Cosmedico. Excellent tanning results in moderate exposure times are guaranteed.

**For your customers, that means indulging in the pleasures of tanning in its most modern guise!**

The right lamp for every requirement!

The low-pressure lamps are available in various wattages and lengths. An “R” in the name stands for “reflector”.

### **Cosmedico Cosmolux UVA plus and RA plus**

Gentle, entry-level lamps that are also perfectly suited

to home and semi-professional units. The UVA and UVB ratio of these lamps is well balanced, so that pigments are formed and darkened at the same time during an extended tanning experience.

### **Cosmedico Cosmolux RX**

Entry-level lamp that is also suitable for professional units. They support pigment formation more effectively in short exposure times.

### **Cosmedico Cosmolux CS, RCS and RS**

Professional lamps with an optimised fluorescent material and a special spectrum that permit shorter exposure times. Pigment formation and darkening are both supported equally.

The RS is the right alternative for all those with a cool head for savings. A specially designed fluorescent material provides an above-average useful life of 1,200 hours.

### **Cosmedico Cosmolux R Professional**

A professional lamp that is particularly used to promote the biopositive effects. The high UVB share also supports pigment formation.

### **Cosmedico Cosmolux RV and RVX P**

Exploit your units to the full. The particularly high UVA share of these lamps permits outstanding darkening of the pigments. They are recommended for the additional tanning of already tanned skin.

**The classic lamps are a sound investment for your tanning salon, with future viability ensured. Our experience and our stringent quality controls ensure premium quality for your customers and highly economical lamps for you.**
