

ENERGY
SAVER

KRYPTON ES

Closer to people,
closer to the sun.

Without compromise.

KRYPTON ES R9 160 W

8% ENERGY SAVING!¹⁾
100% PERFORMANCE!

SAVE OVER²⁾
800 €
EVERY
YEAR!

**YOUR CONTRIBUTION TO
A BETTER ENVIRONMENT!**

THIS IS A MAJOR
CONCERN FOR MANY
CUSTOMERS!

**BOOST
YOUR
IMAGE!**

A sample calculation to demonstrate the financial advantages:
50 lamps feat. 160 W = 8 kWh

8 kW x useful life = 6,400 kWh

6,400 kWh x 8% = 512 kWh

512 kWh at 0.20 € = **102,40 € per sunbed per annum**

Based on an average of eight appliances, the saving at the end of the year totals **819,20 €!**

✓ **Ideal tanning performance thanks to enhanced UV spectra.**

The CO₂ emissions per sunbed can be reduced by 800 kg per year; that is the same volume as 40 trees can absorb in a year.

If all sunbeds throughout Europe were fitted with Krypton lamps, this would prevent the production of 280,000 tons of CO₂ per year.

This could save 1,400 barrels of oil, which represents the energy consumption of 1,200 private households.

✓ **Satisfied customers thanks to the environmentally friendly use of energy in combination with excellent tanning results.**
